

## TP-150

### SIDE-SEAL SHRINK WRAPPING

Whether they're tall, small, hard or soft, your products need to be protected from dirt, damage and debris. But since manual wrapping is so labor intensive and dangerous, it can be difficult to find the best solution. Our line of TP shrink wrapping systems is designed to make wrapping a breeze by lowering operating costs, reducing worker injury and improving your throughput and overall operations.

## OPERATIONAL EFFICIENCY

Specifically designed for smaller products and bundles, the TP-150 is perfect for facilities that want to replace hand wrapping with a faster, more efficient solution that doesn't require manual labor.

Combined with a fully controllable heat tunnel and adjustable conveyors, the TP-150 can wrap as fast as 2 or 3 hand wrap stations, making improving your throughput easier than ever. Talk about efficiency!

## A FEW HIGHLIGHTS

- Minimal maintenance requirements
- World-class technical service post-sale
- Compatible with a variety of materials
- Free training for life

WE SAW THE WRAPPER AT A PARTNER'S FACILITY AND IMMEDIATELY PUT IT ON OUR WISH LIST.

- MARQUITTA SAMPER, VOGUE LINEN
