

ATS US-3000

ULTRASONIC BANDING MACHINE

Are you looking for an industrial quality unitizing machine that is robust enough to function in a 24 hour per day, 7 day per week manufacturing environment? Do you need to unitize products with enough tension to maintain a proper bundle, yet gentle enough to prevent damaging the product as part of the packaging process?

The US-3000 ultrasonic banding machine is the industry leading banding (sometimes referred to as strap-ping) machine designed to function in large scale printing facilities, food processing plants, and even in the demanding environments of metal fabrication shops (and everything inbetween).

SUSTAINABILITY

At the heart of banding is the desire to package products in a sustainable manner. Banding uses a minimal amount of material to hold a variety of different types of products together. The ability to use paper banding instead of plastic films is another great sustainable feature of banding. In addition to reducing the amount of packaging material, banding also uses a minimal amount of energy when compared to alternative technologies such as shrink film which requires large amounts of energy to power a heat tunnel.

A FEW HIGHLIGHTS

- Heat Free Ultrasonic seal
- Intuitive operator control screen (in multiple languages)
- Standard and custom models available
- No compressed air required
- Diverse variety of banding materials available (plastic films and papers)
- Free training and technical support for life

"We had a good experience with the bander. This is an improved bander for the operator with zero experience...The new front cover makes access quicker and the tape infeed is easier to thread. " - Erik Bestow, Bindery Manager at The Marek Group

EQUIPMENT SPECIFICATIONS

ARCH SIZES

360mm (14") Wide x 260mm (10") Tall
260mm (10") Wide x 180mm (7") Tall
Custom Sizes Upon Request

FACILITY REQUIREMENTS

Standard 120V Outlet

SPEED

Up To 35+ Cycles Per Minute

WARRANTY

1 Year

TECHNICAL SUPPORT

Available Via Phone, Video Call, E-mail or In Person For The Life Of Machine

A FELINS PARTNERSHIP

At Felins, we pride ourselves on developing strong partnerships with our customers. From inquiry to installation and training to preventative maintenance services, we'll help you find a custom solution that best optimizes your operations and minimizes packaging waste.

After all, we're inspired to create innovative alternatives because every packaging decision should help, not hurt, our planet.
